

# Session 12C: Harmonizing Compatible Satellite C2 Architectures for an Enterprise of Missions

A panel of members from AFSPC, NRO, ORS, NASA Goddard and European Space Agency will present their progress on Compatible Satellite C2 architecture initiatives. The panel will discuss the challenges and solutions to harmonize the architecture to address needs and requirements for their mission as well as an enterprise of missions. This session will present a live demonstration of the SMC/SN Compatible Sat C2 prototype.

## Current SATOPS Enterprise

## Compatible Satellite Control Architecture
