

Joint SATOPS Compatible Committee (JSCC)

- **Multiple organizations have recognized common evolutionary challenges**
 - Reduce life cycle costs
 - Increase interoperability of satellite control between systems and organizations
 - Provide enterprise-wide space and ground situational awareness
 - Enhance current SATOPS capabilities & availability
- **JSCC collaboration formed among AFSPC, NRO, ORS and NASA organizations**
 - Investigate methodologies & architectures to address challenges
 - Need mature technical alternatives and industry acceptance

JSCC shares lessons learned on defining a SATOPS framework and associated standards that foster compatibility
