

## Joint SATOPS Compatible Committee (JSCC)

- Multiple organizations have recognized common evolutionary challenges
  - Reduce life cycle costs
  - Increase interoperability of satellite control between systems and organizations
  - Provide enterprise-wide space and ground situational awareness
  - Enhance current SATOPS capabilities & availability
- JSCC collaboration formed among AFSPC, NRO, ORS and NASA organizations
  - Investigate methodologies & architectures to address challenges
  - Need mature technical alternatives and industry acceptance

**JSCC shares lessons learned on defining a SATOPS framework and associated standards that foster compatibility**
