

Welcome

Session 10F

Challenges in Developing and Acquiring Systems with Evolving Requirements

Session Chairs

Nancy Kern

Senior Project Lead, SED
The Aerospace Corporation

Mary Jo Gura

Associate Director, CSD
The Aerospace Corporation

Working Group Format

- **Forum for software-intensive ground system experts**
 - ❖ Developers, acquirers, users, and researchers
 - ❖ Share knowledge and experience in developing & acquiring systems with evolving requirements
- **Presentations 1:00pm to 3:00pm**
 - ❖ Briefings by senior acquisition experts
 - ❖ Q&A during each briefing
- **Panel Discussion 3:30pm to 5:00pm**
 - ❖ Panel members with extensive software acquisition experience
 - ❖ Continued discussion of briefing topics
 - ❖ Discussion of audience concerns & ideas

Working Group Focus

Issues Related to Evolving Requirements Include:

Requirements Creep

Volatile Baselines

Unrealistic Schedules & Budgets

Inadequate Test Plans

Undefined Space/Ground Interfaces

End-to-End Performance Requirements MIA

Participating Acquisition Experts

- **Invited Speakers/Panelists**

- ❖ **Suellen Eslinger**

- Distinguished Engineer
The Aerospace Corporation

- ❖ **Brian Gallagher**

- Director, Acquisition Support Program
Software Engineering Institute

- ❖ **Linda Martz**

- Engineering Director
Raytheon IIS Rocky Mountain

- ❖ **Asya Campbell**

- Systems Director, AEHF
The Aerospace Corporation

Presentations

- **Acquiring Software-Intensive Ground Systems with Evolving Requirements**
 - ❖ Suellen Eslinger has over 40 years experience in the acquisition of software-intensive systems and has led numerous Aerospace software research projects. Her presentation focuses on methods for reducing software acquisition risk due to evolving requirements.
- **Identifying Acquisition Patterns of Failure Using Systems Archetypes**
 - ❖ Brian Gallagher is Director of the SEI's Acquisition Support Program, supporting the needs of DoD and other government acquisition programs. His presentation describes a method used to describe and analyze common patterns of failure in software-intensive acquisitions.
- **How Raytheon Meets the challenge of Developing Systems with Evolving Requirements**
 - ❖ Linda Martz has over 30 years of experience in managing and developing complex software systems. She will describe some best practices and lessons learned in managing the development of numerous systems, including NPOESS Ground.
- **Advanced Extremely High Frequency (AEHF) Program, Mission Control Segment (MCS)**
 - ❖ Asya Campbell is the Aerospace Systems Director for AEHF Mission Control. She will describe how the Government and Contractor teams have worked together to meet the challenges of developing the AEHF MCS.
