

Alessandro Donati

Head of the Advanced Mission Concepts and Technologies Office

Alessandro Donati has more than 20 years of experience in satellite operations at ESOC, ESA's European Space Operations Centre, Darmstadt, Germany. In 2001 he founded and led the precursor to today's AMCTO, a 'skunk works'-style office devoted to introducing and exploiting advanced enabling technology in support of innovative mission operations concepts. Alessandro holds a Masters of Electronic Engineering degree from the University of Rome La Sapienza.
