Carlos Rexach

Carlos Rexach joined the Aerospace Corporation in 2005 as a Senior Project Engineer in the MILSATCOM Division. He was promoted to Senior Project Leader and joined the Navigation Division in 2010. Prior to joining Aerospace, he worked at Titan Systems Corporation as Director of the MILSATCOM Test and Evaluation. Mr. Rexach served in the Navy from 1981 to 2001. Mr. Rexach was selected as Senior Project Leader in the Software Engineering Subdivision July 2014 and provided leadership and expertise in software development, testing, and software engineering. Mr. Rexach joined the Enterprise Ground team in 2015 and manages Data Exploitation and User Experience prototype development. He also contributes to software acquisition policy and guidance, software metrics, software risk management, software quality attributes, and software engineering development and testing. Mr. Rexach has a master's degree in Electrical Engineering from Naval Postgraduate School.
