Gabriel Rybeck

Gabriel (Gabe) Rybeck is a data scientist at Booz Allen Hamilton. His work focuses on enabling Machine Learning capabilities for the Intelligence Community using cloud services, Kubernetes, and TensorFlow, among other technologies. Gabe has a background in Machine Learning research from his time at Haverford College. He focused his research on ML Interpretability including developing novel techniques for interpreting black-box models ("Auditing black-box models for indirect influence") as well as analyzing the unintended consequences of black-box models in our everyday lives ("Indirect Discrimination in the age of Big Data"). Outside of work, he loves Ultimate Frisbee and hiking.
