

Ground System Architectures Workshop

Justin Boss
Platform Architect
Kratos

Justin Boss is a Platform Architect with Kratos and has supported many federal and commercial projects. In his current role, he oversees the system architecture of the OpenSpace products in the areas of security as well as the developer experiences. He is a proponent of open standards and collaboration as the chair of the Space Domain Task Force within the Object Management Group, an editor for multiple of its specifications, and a contributor in public open-source software projects

Steve MacLaird
Sr. Vice President
Object Management Group

As Senior Vice President, Steve's primary focus is to support the OMG government activities. Secondary focus is business development for the other OMG communities including the Industrial Internet Consortium® (IIC™) and the Consortium for Information & Software Quality™ (CISQ™), Digital Twin Consortium® (DTC®), and the Data Distribution Service (DDS®) Foundation®, along with other duties. Steve retired from the United States Air Force after 27.5 years. Upon retirement, he consulted with a number of Fortune 200 companies as well as large, medium and small companies, DoD Services, a number of 3 letter agencies and the Department of Energy. He was Vice Chairman of the Board for PrismTech Solutions Americas; and a military advisor to the United Arab Emirates. His career spanned contracting, financial and program management for air, land, sea and space based platforms along many areas of the Battle Management Command, Control, Communications Intelligence, Surveillance and Reconnaissance (BM-C4ISR) kill chain. While on active duty, Steve supported the AEHF, MilSATCOM, MOUS, T-SAT and several NASA programs in addition to many aircraft and communications programs.
