

LtCol Barasha

Lieutenant Colonel Laila S. Barasha is the ACAT-1 Materiel Leader for Evolved Strategic SATCOM (ESS) Ground, developing Ground Resilient Integration & Framework for Operational Nuclear Command, Control, & Communications (NC3) (GRIFFON). She has been a pioneer in the utilization of the Software Acquisition Pathway to deliver an innovative and resilient next generation NC3 ground architecture. Lt Col Barasha transitioned from the Air Force to the Space Force in the summer of 2021. She is a graduate of the University of Colorado and AFROTC Det 105. She is a Developmental Engineer and Acquisitions officer. During her career, Lt Col Barasha served in a variety of assignments to include aircraft sustainment, missile warning and missile defense operations, Joint Overhead Persistent Infrared (OPIR) ground (JOG) exploitation, and strategic and tactical military satellite communications. She has deployed OCONUS in an International Affairs and Theater Security Cooperation role.
