

Ground System Architectures Workshop

Amplifying User Effectiveness: Automation, Augmentation, and AI/ML

February 24–27, 2025 Renaissance Los Angeles Airport Hotel Los Angeles, CA

Working Group D: Readying Data for AI/ML through Ontologies, Ontology Standards, and Best Practices

- Leads: Dr. John Beverley & Mr. Mark Jensen
- Number of Participants: ~40
- Format:
 - Conversational and deliberately informal.
 - Presentations with breakouts where participants worked together in small groups.

Goals:

- Introduce the tradecraft of Ontology as a method for improving data quality at scale for achieving interoperability and reducing data silos.
- A different kind of data quality.
- Teach a repeatable process and strategies for using knowledge representation techniques to model data.
- Inspire and equip., an introduction to a community.

Summary:

- Intersection between AI and knowledge graphs is becoming increasingly critical.
- Building knowledge graphs is not enough.

Working Group D: Readying Data for AI/ML through Ontologies, Ontology Standards, and Best Practices

Thanks!
