

GSAW Ground System Transition
Working Group:
Transition Concepts

Lt Col Lane Gilchrist

Rules of Engagement

- **Format: Panel and discussion**
 - **Presentations**
 - **Q&A**
- **Please limit questions during presentations to clarification only**
- **Note questions for later Q&A and discussion**
- **We'll have a brief recap at the break**

GOAL: Establish Transition discussion forum for further communication and lessons learned.

Overview

- **Mission**
- **The Main Players**
- **Transition Team Roles**
- **Organizational Structure**

Mission Statement

Operational Wing Transition Team Mission

Provide transition expertise that applies tried and true principals, approved military guidance, and processes specifically engineered for transitioning satellite systems to operations

Main Players

- **Operational Wing Transition Team (OWTT)**
 - “Operational Wing may create internal teams utilizing their own resources to start addressing, transition, scheduling, fielding, training, manning and other programmatic issues to facilitate efforts.”
 - “These Wing members may also serve as members of the Integrated Activation Transition Team.”
- **Integrated Activation Transition Team (IATT)**
 - “Supports Materiel and Operational Wings in developing testing, training and transitioning new systems to operations.”
 - Transition team composed of entire community (e.g. testers, trainers, developers, operators, etc.)
 - Under leadership of Transition Director
- **Transition Director (TD)**
 - Appointed by Wing Commanders to lead the IATT
 - One stop POC and main decision authority for transition activities
- **Site Activation Task Force (SATAF)**
 - Also supports transition activities
 - Program office personnel resident at operational site

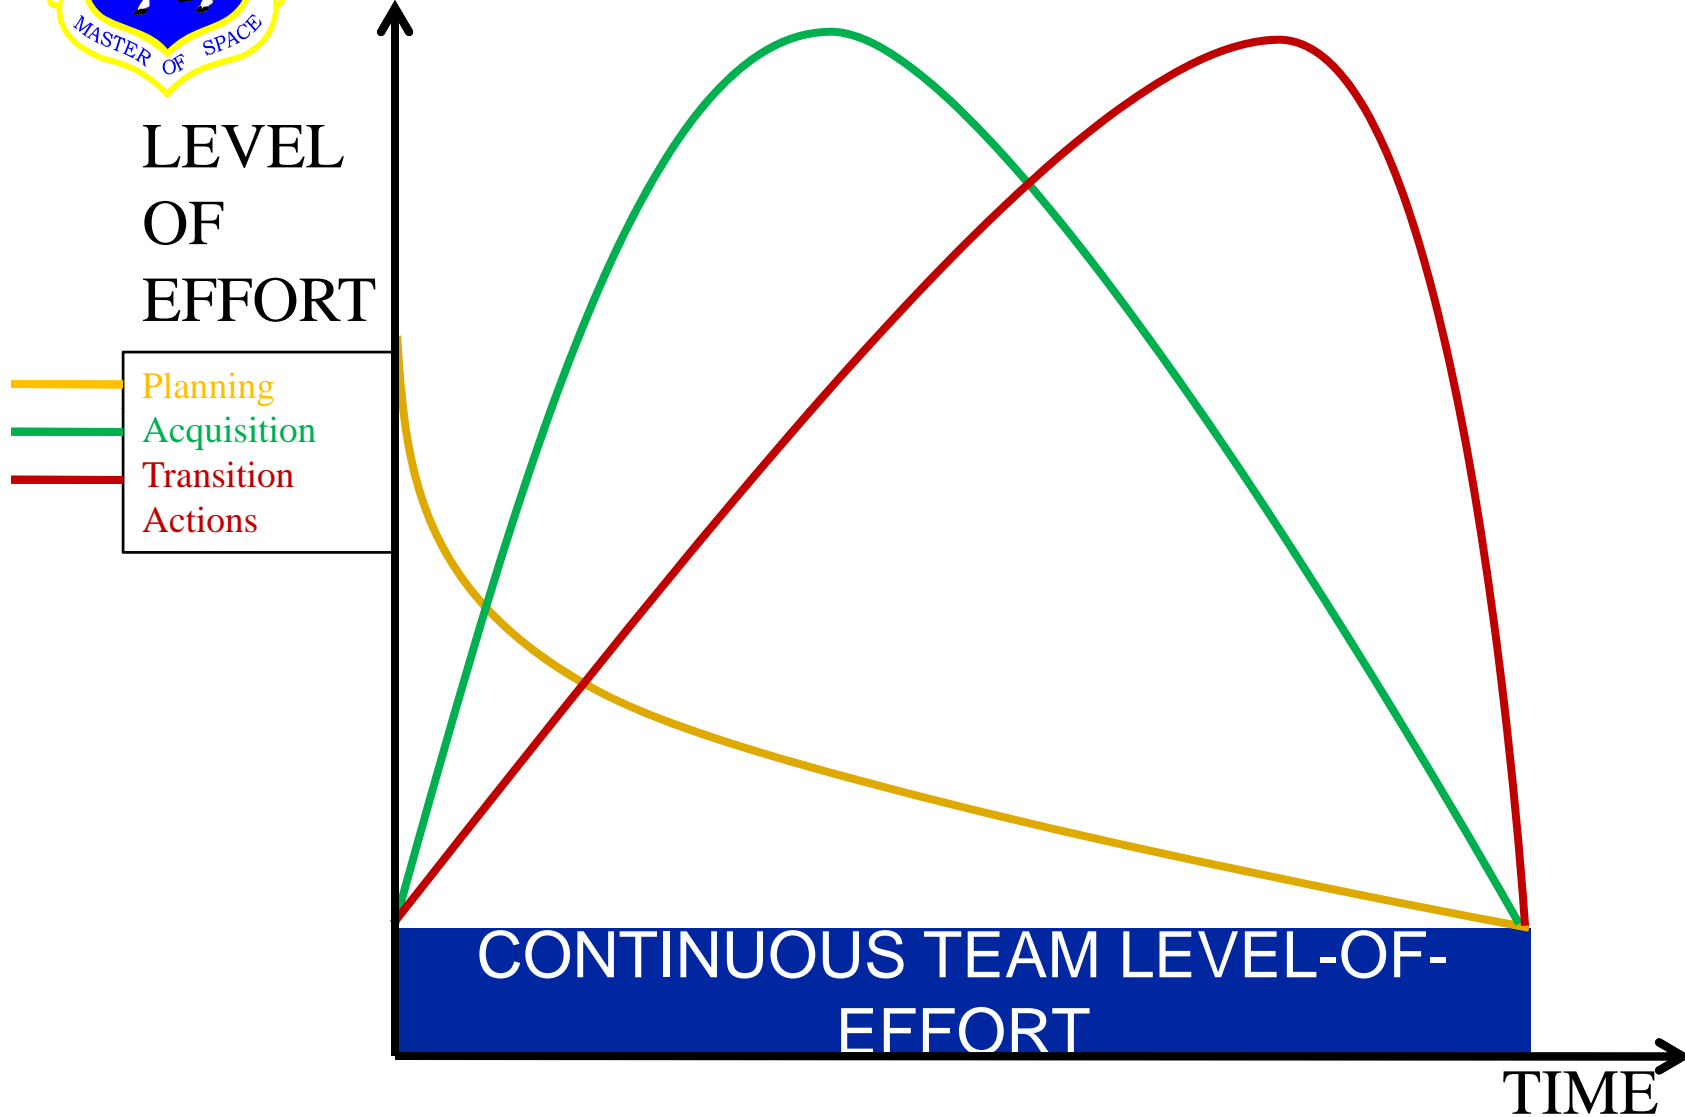

Transition Team Roles

- **Operational lead for programs from Phase-C forward**
 - **Interface for programs approx. 1-2 yrs from transition**
 - **Work with base units to “beddown” new systems**
- **Provide operational expertise interface throughout development of program**
 - **It’s never too early to think about transition...**
 - **Captures lessons learned to share with other teams**
- **Act as wing component for an Integrated Activation Transition Team (IATT)**
 - **The “community” team that does the transition**
 - **HW/SW installs, training, test readiness, transition scheduling, etc.**
- **Supports planning development (Transition plans, test plans, training plans, etc.)**
- **Answers question “Where do I plug this in?”**

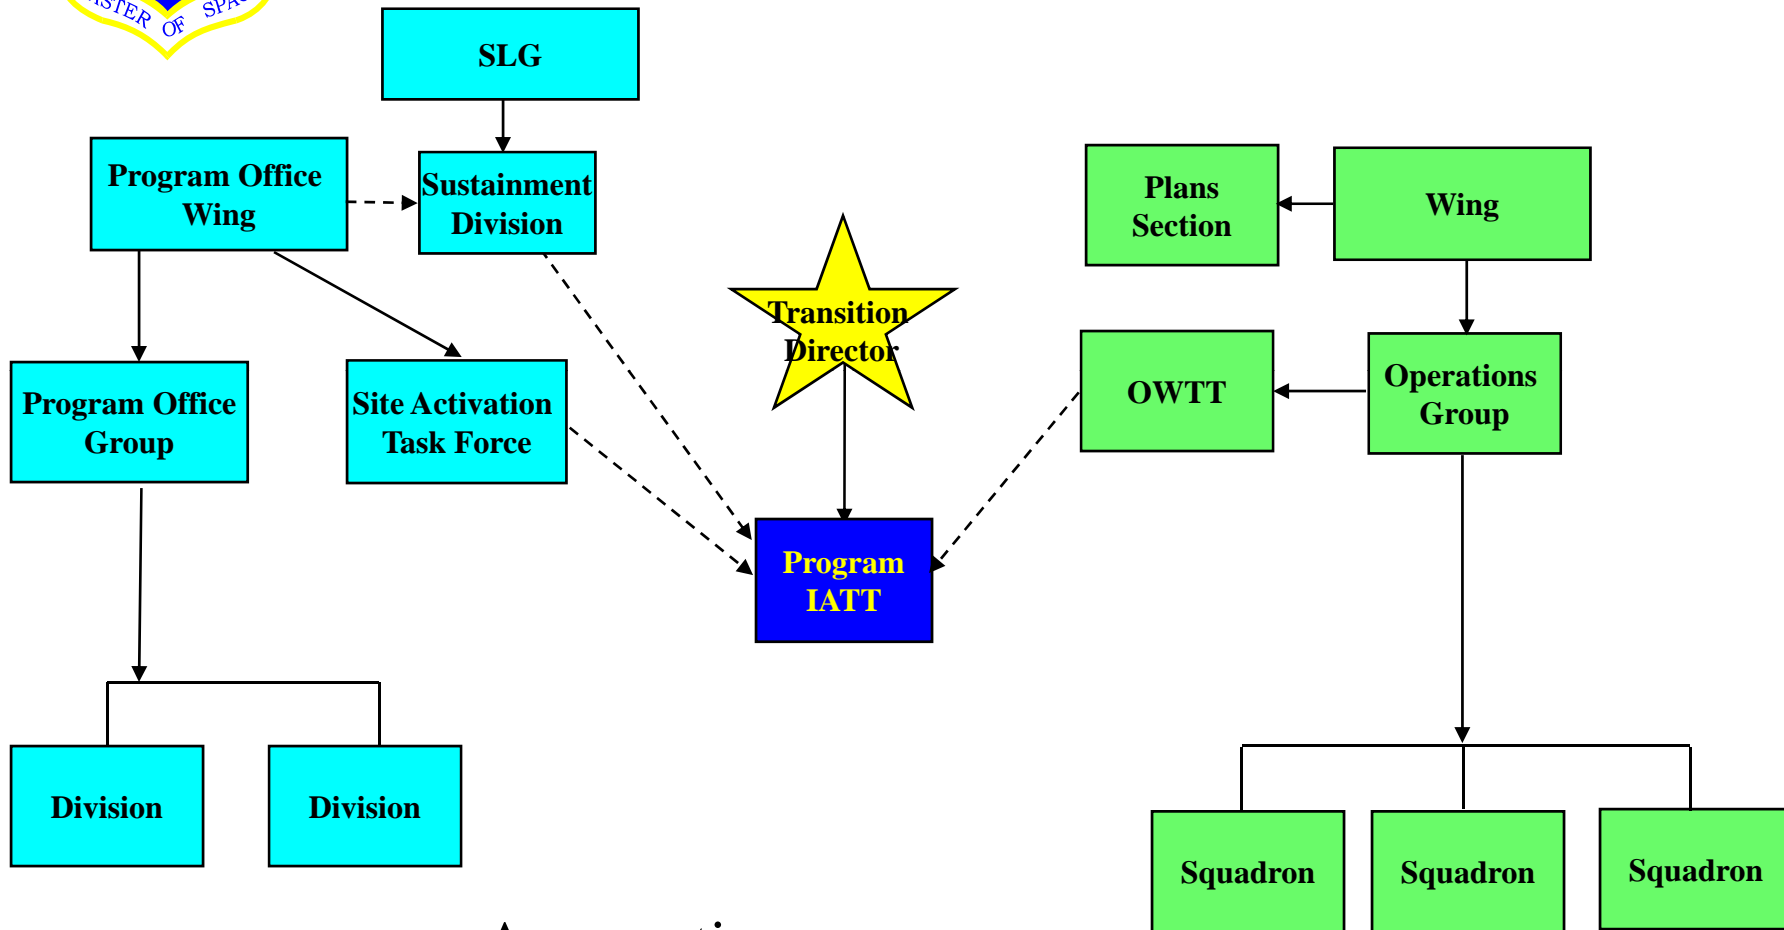

Develop/Operations Level of Effort

NOTIONAL PROGRAM EFFORT

Transition Team Functional Structure

Assumptions:

- Each major program has an IATT responsible for transition to ops activities
- Membership is not limited (e.g. includes test community, logistics, etc.)
