

## **Pierre Bornuat**

Pierre has been working for 26 years, including 20 years in the space industry, mainly on control centers and ground segments, and on mission simulation. His experience has been acquired by participating un numerous major projects at CS GROUP (ATV Monitoring & Control, Pleiades Secure Ground Control Centre integration, CSO mission simulator, EGS-CC phase C/D) for European Agencies (CNES, ESA). Pierre manages the Operational Products Skill Center in the Flight Mission and Operations department of CS GROUP Space Business Unit, in which CS Nano has been developed by a very experimented team of engineers specialized in control centers software.
