

## Elaine Zeng

Elaine Zheng worked on the design and front-end development on the Human-Swarm Interaction user interface during her time as a Software Engineering intern at NASA Ames Research Center, working from June to December 2020. She worked within the Distributed Spacecraft Autonomy team to support operators viewing swarm status for Starling 2021 flight launch and scalability study. Prior to NASA, Elaine has interned at Amazon and NBCUniversal working on software development in the fields of full-stack web development and enterprise applications development. She is currently an undergraduate student at Rutgers University, New Brunswick pursuing a Bachelor's in Computer Science. In her free time, she enjoys graphic design-having designed for various organizations including non-profits and academic clubs.
