Alysia Palmer

Alysia Palmer is the lead User Experience (UX) Engineer at The Stratagem Group with over 10 years of experience for the commercial world and the IC, in the full software development lifecycle; as a UX designer, product owner, scrum master and enterprise application developer, etc. Alysia has worked across many organizations within the DoD and IC, educating on the importance of UX, and implementing those best practices on every program. She kickstarted the UX work on Lumos, the space domain awareness sensor quality solution for Space Force Space SMC. She also served as user engagement lead for Watchman, NGA-Research's flagship Computer Vision application. Watchman was one of NGA's first major Machine Learning project that enabled operators to tune and train the network. Alysia's use of UX turned Watchmen into a highly efficient analyst tool that allowed for reporting on activities of interest in seconds. Alysia has a passion for creating and delivering solutions that elevate the user experience, while using cutting-edge technologies to address unique challenges, and hopes to continue to elevate UX within the DoD and IC.
