

Anthony Walsh

Anthony Walsh has been working since 2011 as an Operations Data System Manager at ESA/ESOC and has responsibilities in the development and maintenance of ESOC's monitoring & control systems and simulation infrastructure. He is currently technical manager and systems lead on the development of ESOC's next generation of monitoring & control system infrastructure, which is based on the European Ground Systems Common Core (EGS-CC) initiative in which Anthony has taken a leading role. Anthony is systems architect for the Multi-Mission Infrastructure Programme, which is the subject of this presentation.
