

Aaron Rice

Aaren Rice is a systems engineer at The Aerospace Corporation in the Modeling and Simulation Department. He is the technical lead for Project Huddle and supports various Digital Engineering initiatives and tool development efforts. Prior to Aerospace, Aaren worked at the Savannah River Nuclear Solutions where he modeled and analyzed criticality accident scenarios to ensure the safe processing of radioactive material. Aaren attended University of Tennessee for his undergraduate degree and University of South Carolina for his Masters in Nuclear Engineering. He is also an aspiring part-time professional beach volleyball player.
