John Guiney Vice President

OneWeb, Fleet Management

John and his team are responsible for the design, development, and delivery of OneWeb's Fleet Management Segment (FMS) including the Satellite Operations Center (SOC) hardware and software, and the Telemetry, Tracking, and Control (TT&C) Earth Stations. John has more than 37 years of Mission Operations Center experience and has directly participated in the launch and early orbit operations of more than 34 launches of more than 210 satellites.
