

Ground System Architectures Workshop ***Driving Innovation for Enterprise Integration***

February 23–March 3, 2022 | Virtual Event

Scott Leonard

Scott Leonard serves as the Special Advisor to the Office of Space Commerce Director. He is considered a senior scientific leader with over 30 years of professional experience in aerospace. He currently leads the development of a ground system prototype called the Open Architecture Data Repository which will serve as SSA management system to provide conjunction notifications to the US satellite community. In this capacity, he's applying cutting-edge satellite ground initiatives using open architecture and enterprise solutions to support the growing concern of a congested space environment. Prior to his work at Space Commerce, Mr. Leonard served as the Director of the Mission Operations for NOAA satellites and Department of Defense in several technical leadership roles.
